CIVILIZATION

VINAY PASRICHA

6.25 × 9.5 in · cream, deep ink, a single gold dot

THE FULL JACKET

Back · spine · front, as one printed sheet. The spine carries only the title, the author,
and the sigil at its base. No publisher mark on the front.

BACK · SPINE · FRONT

MODE 2 — THUMBNAIL

At 84px, in a row of conventional covers. The form survives; the gold dot compresses toward a point. The eye stops on the one shape it cannot read.

MODE 3 — DEBOSSSED

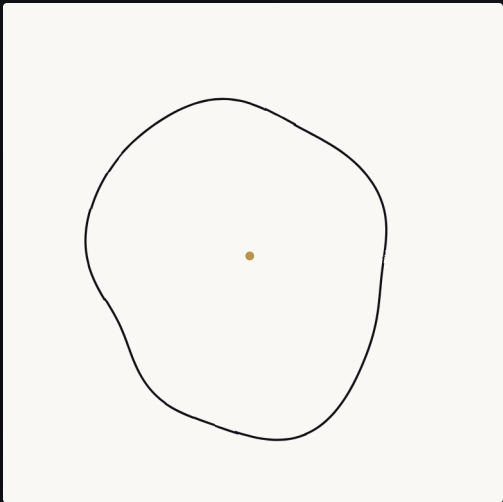

Black hardback, sigil struck in matte gold. No title, no author. Recognisable by touch and by sight — an object, not a logo.

THE MARK, AND ITS RULE

It is not drawn. The curve is one closed path defined entirely by a polar equation — a circle perturbed by eight harmonic components. The framework's eight directions live in the spectrum, not on the surface; a viewer counts no eight. Given the coefficients, the form is reproducible exactly — anyone who follows the rule draws the same sigil.

That is the difference between a mark and a shape.

$$r(\theta) = R \cdot (1 + \sum_{k = 1 \dots 8} a_k \cos(k \theta + \varphi_k))$$

K	A _k	Φ _k
1	0.120	2.35
2	0.075	0.62
3	0.050	3.30
4	0.022	1.10
5	0.018	0.40
6	0.013	2.00
7	0.010	5.00
8	0.008	1.50

THE INSIDE FLAP

Folded inside the back cover. The author note, set in the same serif — the questions the book begins from, not a résumé.

ABOUT THE AUTHOR

Vinay Pasricha has spent much of his life building organizations and studying the forces that allow them to survive, grow, and adapt.

Why do some ideas persist for centuries while others vanish?

Why do civilizations rise, transform, and endure?

Are there deeper patterns beneath the apparent chaos of history?

CIVILIZATION is an attempt to explore those questions. He lives and works in India.

VINAY PASRICHA

*The gold dot sits where the form's own logic places it — a little off true center. It is
not explained here. It will not be.*
